

# Complete Solutions for Process Industries

Supporting mining, petrochemical and processing projects across Australia

## 30+ Years of Project Expertise

**Australian-owned specialists in piping, valve and lining supply for the energy sector.**

PFP is a wholly Australian-owned project supply solutions specialist, providing piping, valve, and lining systems for the energy industry with over 30 years of experience. We support projects of all sizes by combining technical expertise with reliable global and local supply chains.

Our focus is on delivering products specifically designed to meet client requirements, while helping reduce procurement complexity and manage quality and timeline risks in demanding, high-output operating environments.

## Flexible Global Supply Network

**Utilising our network of approved mills across Europe and Asia, as well as trusted and innovative emerging mills, we are flexible in our supply approach.**

This enables us to provide multiple sourcing options that carefully consider pricing and delivery requirements while maintaining full technical & material origin compliance.

**Over \$275+ Million  
in Key Projects**

**RIO TINTO**

**BHP**

**SOUTH 32**

**TRONOX**

**QUEENSLAND ALUMINA**

**LYNAS RARE EARTHS**

Our core capabilities include the supply of bulk piping (carbon, stainless, and alloy), composite and alloy-lined systems (PTFE, HDPE, CRA), exotic materials (duplex, super duplex, Hastelloy, Inconel, titanium, CuNi, 904L, chrome moly), valves suited for corrosive, abrasive, and high-pressure or high-temperature applications, as well as custom-fabricated heat exchangers and pressure vessels built to project specifications.

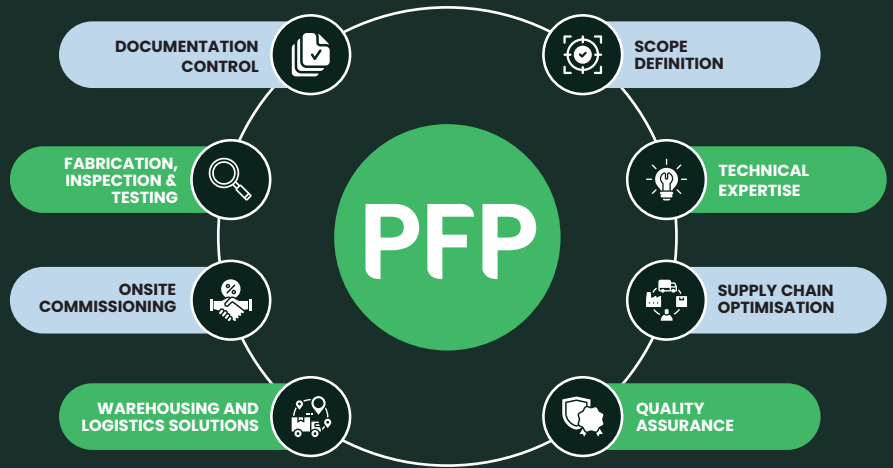

**YOUR PARTNER IN PIPING**

1/245 Barrington St, Bibra Lake WA 6163 / PH: +61 8 6399 0600 / E: salesperth@pfp.com.au

# Project Solutions

Our integrated approach to delivering complete project outcomes.

## Pipe & Fittings Project Supply

Supply of carbon steel, stainless steel, alloy, and exotic materials for piping, valves, flanges, fittings, boltings, gaskets, in line with project specifications and delivered reliably to support construction schedules and critical project timelines.

- Mill-Direct and Stockist Supply Network • Custom Fabrication & Project Packages
- Quality, Sourcing & Logistics Management • Manual & Automated Actuation Valves
- Lined Valves (PTFE, PFA, PVDF) • High Temp & Pressure Valves

## Corrosive Resistant Piping Solutions

Offering lined Piping, Fittings, Valves & Sheet in full range of polymer linings to ASTM F1545-15a such as PTFE / FEP, PFA, PVDF, Tefzel (ETFE), PP, HDPE and extensive supply options for solid CRA alloys

- Full Lined Valve Offering • Largest Installed Base in Australia
- Special Alloy Supply (Titanium, Stainless & Exotic Alloys) • Type Test Certificate for Cyclic & Vacuum • All PTFE from Chemours ("Dupont") Custom/Complex Fabrication
- Lined Valves (PTFE, PFA, PVDF) • High Temp & Pressure Valves

## Wear Resistant Piping Solutions

Offering a complete range of wear resistance liners for most abrasive applications. Whether it be lined steel, wear resistant composite thermoplastic pipe, weld overlay/hardfacing PFP have the optimal solution for the process

- HDPE/UHMPE/PU/POE Lined Steel Slurry Pipe • Wear-Resistant Reinforced Thermoplastic
- 12 to 500mtr lengths depending on material/size • Multiple Connections (Flanged, Threaded, Coupling or Crimping) • Ready for Installation Fully Fabricated / Coated Spools
- Custom/Complex Fabrication

## Heat Exchangers & Fabrication Services

Shell and tube heat exchangers and custom fabrication solutions including pipe spooling and modular skids, manufactured to project specifications and aligned with international codes and quality standards.

- Shell & Tube Heat Exchangers • Pipe Spooling & Skid Fabrication • Local & Offshore Manufacturing
- Carbon, Stainless & Exotic Materials • Automated Welding & Re-Tubing
- Hydrotesting & Inspection
